" Dy. Commrs. of the
" Presidents of Local Boards
" Presidents of Municipal Boards
of Local Boards
" President Cutch Board, Karachi

"Rules to regulate the allotment of funds by the Central Sanitary Board towards improvements of sanitation in towns and villages.

---

1. Allotments from out of the sanctioned grant may be made for the following classes of sanitary works:--

(a) provision or protection from contamination of water supplies in Municipalities.

(b) drainage systems in Municipalities.

(C) formation of town extensions.

(d) construction of model sanitary houses of approved designs in selected areas.

(e) construction of epidemic diseases hospitals.

(f) conducting ~~of~~ scientific malarial surveys and adoption of preventive measures against malaria, and

(g) generally, for any other improvements recommended by officers of the Sanitary Department, and approved by the Central Sanitary Board.

2. Early in January each year, the Secretary Central Sanitary Board, shall frame proposals for consideration by the Board for the allotment of the State grant for the coming year to various local ~~Boards~~ bodies, with reference to the recommendations of the Board as to Sanitary Improvements falling under the above classes made to those local bodies and to Government, and to the Register of schemes prescribed in appendix (C) to Government Proceedings No.5113-63/Gen.86-13-35 dated 8th Febraury 1917. The State grant for the purpose of this rule will be taken as the average of the grants made during the preceeding three years

(64)

3. Before the 15th of January each year the Presidents of the District and Municipal Boards will furnish the Sanitary Commissioner with a statement showing in detail the works falling under any of the classes indicated in rule 1 for which provision is propsed to be made in the municipal and district board budgets for the ensuing financial year, with explanatory notes as to the grounds for considering the works to be of an urgent nature. The lists shall be in two parts, one showing the works proposed to be carried out by the local bodies themselves and the other those proposed to be entrusted to the State Public Works Department. The statement should also show the amount of grant-in-aid, if any required by the local bodies in respect of each work to supplement their resources in order to be able to carry out the sanitary works resolved upon by them. When a grant-in-aid is asked for, the applications should invariably be supported by a statement of income of and expenditure in the local area, with full reasons explaining the necessity for/~~the~~ grant-in-aid ~~applied for.~~

4. On receipt in the Sanitary Commissioner's Office, the lists will be scrutinised with reference to the proposals framed under rule 2 and placed before the Central Sanitary Board, with a memorandum showing the variations between the works proposed to be budgetted and those previously listed in the Sanitary Commissioner's Office as requiring attention. In deciding what works should have priority over others

105

the expectation of a particular work tending to restrict the incidence - as revealed by the recorded health statistics - of epidemic or other preventible diseases should form a most important consideration. The resolution of the Central Sanitary Board as to the approval by them or otherwise of the items proposed by the local bodies, the new items of work considered necessary and the extent of financial help the Board are prepared to recommend - will be communicated by the Secretary to the local bodies concerned not later than the ~~end of 15th~~ Febraury every year, a copy of the resolution being at the same time submitted to Government for information.

5. As soon as the State budget is provisionally passed by Government, a meeting of the Central Sanitary Board will be convened by the Sanitary Commissioner to consider the allotments that may be made out of the State grant for sanitary improvements. Such meeting may preferably be held during the Birth-day week in Mysore, when the President may invite all or any of the Deputy Commissioners as well as selected District Sanitary Officers to be present, with a view to obtain from them practical suggestions in regard to the details of allotments. The Sanitary Commissioner will furnish to Government not later than the 30th. June copies of the approved lists of allotments for sanction and communication to the Comptroller as well as to the Presidents of the District and Municipal Boards concerned.

(66

6. The necessary funds as far as possible to the extent of the allotment recommended by the Board and available from the final budget allotment under the head of Sanitary Improvements will be placed at the disposal of the local bodies when the works are taken in hand and funds are applied for.

7. As a rule no proposal for allotment can receive consideration unless the following conditions are fulfilled:-

(1) The local body concerned should have definitely resolved to carry out the work.

(2) The details of procedure, including the consideration and acceptance of plans and estimates, should have ~~xxx~~ reached a stage at which the work can fairly be expected to be put on hand during the ensuing year, ~~and~~,

(3) The local body should be prepared to ~~pay~~ meet not less than 50 per cent of the estimated cost of the work out of its own revenues.

7. The State grant for sanitary improvements should never be drawn upon for payment towards the cost of sanitary works that the local body is expected, or is able, to provide for out of its own normal income; nor, except in special cases of financial inability, should the limit of contribution exceed one-half of the total estimated cost of the work.

67

8. Once a grant is allotted, the expenditure thereof will be governed by rules appertaining to procedure and agency, in the same manner as if the grant formed part of the general funds of the local body. Provided that in case of the grant remains unspent or only partially spent at the close of the year, the whole or the remaining part of it shall lapse to Government and shall not be utilised again except with the renewed approval of Government on a recommendation of the Board.

Letter No.905-I.P., dated the 26th July 1917, from the -- Secretary to the Government of Madras, Local and Municipal Department, to the Hon'ble the Resident in Mysore.

San 45-17 Sl 1

I am directed to invite reference to the circulars of the Mysore Plague Commissioner printed in the appendix to the Proceedings of this Government, No.1129 P., dated 26th November 1900, on the subject of the communication to Tahsildars in this Presidency of information regarding outbreaks of plague in frontier taluks. The Collector of Bellary has recently reported that his Tahsildars are now getting no direct information from officers of similar status in Mysore and consequently have no knowledge of the existence of plague in the neighbourhood of their taluks until he communicates to them the contents of the weekly reports received from the Government of Madras. His Excellency the Governor in Council will be glad if the system of direct local inter-communication can be revived and if in addition orders can be issued that, when plague breaks out in a village within five miles of the frontier, special intimation may be sent to the Tahsildar of the adjoining taluk in this Presidency, the name of the village being mentioned. I am to request that you will be so good as to move the Durbar to have the -- necessary instructions issued to the Taluk authorities concerned. His Excellency in Council is prepared to issue similar instructions to taluk officers in this Presidency.

Pol. 292 25/8/17

No. 712 cm: Pol. 2 4 AUG 1917

Mysore Resident's Office,

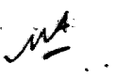
Bangalore, 24th August 1917.

A copy of the foregoing letter, with a copy of the appendix referred to is forwarded to the Secretary to the Government of His Highness the Maharaja of Mysore, General Department, with the request that, if there is no objection, the necessary instructions in the matter may kindly be issued and copy of the orders passed -- being kindly supplied to the undersigned for communication to the

Government

Government of Madras.

First Assistant Resident.



Encl to 511 29

Appendix.

Circular Nos. 767-75.

The undersigned has reason to apprehend that, owing to the gradual subsidence of plague in many districts till very recently, the instructions regarding prompt intimation of plague cases being given to neighbouring British authorities have been lost sight of.

The attention of the Deputy Commissioners of districts is therefore invited to this office circular No. 5549-56, dated 6th January 1899, and they are requested to see that the instructions therein contained are strictly carried out.

As a rule, on the first outbreak of plague in any place intimation by telegram should be sent by Deputy Commissioners to the Collectors of the adjoining British districts and subsequently copies of daily and weekly returns of plague should also be forwarded to the Collectors till the epidemic disappears.

Amildars and Deputy-Amildars should be instructed to send intimation by post of plague cases direct to the Tahsildars of the neighbouring British taluks.

A list of the neighbouring British districts is herewith forwarded.

List of British districts bordering on those of the Mysore State.

District.	Bordering British district.
Bangalore	Salem
Kolar	North Arcot, Cuddapah and Salem.
Tumkur	Anantapur.
Mysore	Coorg, Malabar, Nilgiris & Coimbatore.
Hassan	South Kanara and Coorg.
Shimoga	North Kanara, South Kanara & Dharwar.
Kadur	South Kanara.
Chitaldrug	Bellary and Dharwar.

Bangalore.
5th September 1900.

(Signed) H. Ramaiya.
for Plague Commissioner in Mysore.

To the Deputy Commissioners of Districts.

Circular.

In continuation of this office circular Nos.767-75, dated 5th September 1900, the Deputy Commissioners of Districts are requested to impress on the Amildars of taluks the importance of sending prompt intimation of plague cases in any village in their taluks to the

authorities

authorities of the neighbouring British taluks. The Amildars should be informed that they will be held responsible for the accuracy of their reports and for the timely despatch of the same.

2. The Deputy Commissioner of the Mysore district is requested to instruct the Amildars of his district to be particularly watchful of the march of plague towards the Nilgiri district, and to give immediate information of the appearance of plague to the Tahsildars of the British taluks.

3. Reports of the first occurence of plague in any bordering village should be sent either by post or muddam whichever may reach earlier.

4. Deputy Commissioners in the State are requested to pay particular attention to their keeping the officers of the neighbouring British districts informed in time of plague cases and to warn their subordinates that serious notice will be taken of any remissness in the performance of this duty.

Mysore.
27th September 1900.

(Signed) V.P.Madhava Rao,
